

**GOLDEN RETIREMENT ("The FUND")  
Fund Performance Report  
for the month of Feb-21**

(PGC 20)

FUND DETAILS	INVESTMENT STYLE & APPROACH	OBJECTIVE
Fund Currency: Ringgit Malaysia Inception Date: 12-Sep-12 Fund Size: RM18.92million Unit NAV: 1.19 As of: 28-Feb-21 Initial Charges: 5.0% of Single Premium Tenure: 15 years Subscription: Closed Fund Management Fee: Up to 1% per annum of Net Asset Value Surrender Charge: Accumulation period: 3% of NAV (1st to 5th year) Payout period: 1.50% of NAV (6th to 15th year) Maturity: 11-Sep-27 Basis of Unit Valuation: Net Asset Value (NAV) Frequency of Unit Valuation: Daily Fund Manager: Etiqa Insurance Berhad	The fund adopts dynamic asset allocation strategy whereby at least 80% of the total fund collected will be invested in fixed income instruments (conservative assets) to provide for the guarantee while the balance of the total fund collected, after deductions of all initial charges will be invested in an Active Index Portfolio (AIP) provided by Deutsche Bank (DB) which is currently rated as AA1 by Rating Agency Malaysia (RAM).  Active Index Portfolio (AIP) consists of a mixture of equities, commodities, global bonds and cash as their underlying instruments for potential return.  The investment in the AIP will be reviewed monthly and if the market value has grown (higher than the previous highest level) at the time of review, the growth is locked-in. If the market has fallen, you will remain locked-in at the previous locked-in level.  The fund's performance will be monitored closely and allocation may be adjusted according to market conditions to maximize the return while mitigating adverse market movement effects.	Golden Retirement aims to pay annual guaranteed minimum cash payment from the end of the 6th to 15th policy years. It also aims to provide potential return, if any.

**GUARANTEED CASH PAYMENT PAYABLE AT THE END OF 6th TO 15th POLICY YEAR**

Guaranteed Minimum Annual Cash Payment	Guaranteed Minimum Annual Cash Payment as of Feb 2021
11.00%	11.138%

Note : i) Golden Retirement pays 11% of Single Premium per annum at the end of 6th to 15th policy year (payout period) which means at least 110% of capital will be paid back in 10 equal amounts during the payout period.  
 ii) Any potential return locked-in during accumulation period will be added to Guaranteed Min Annual Cash Payment and will be paid equally in 10 installments at the end of every year during payout period.  
 iii) The last locked-in profit was 0.138% at CPPI NAV level of 16.50 in January 2013.  
 iv) Guaranteed Min Annual Cash Payment is net of tax.

Note:  
 1) Past performance of the fund is not an indication of its future performance.  
 2) This is strictly the performance of the investment fund, and not the returns earned on the actual premium paid of the investment-linked product.  
 3) The above past performance is calculated based on the NAV return for the respective periods. Computed as:  $\frac{\text{NAV}_{\text{end}} - \text{NAV}_{\text{start}}}{\text{NAV}_{\text{start}}} \times 100$   
 4) Average annual return is calculated based on compounded return method.

Active Index Portfolio consists of a mixture of Equities, Commodities, Global Bonds and Cash Instruments.

• In February 2021, the fund recorded -0.08%. For 5 years performance, the fund registered 17.52% return.

**RISK AND RISK MANAGEMENT**

Risk of Investing Investment-linked Funds  
 No venture into investment can be said to be of no risk at all unless it is guaranteed. Since the value of a guarantee is only as good as its guarantor, the fixed term deposit is probably the safest on investment. However, a higher inflation rate than interest rate causes money to decrease in value and drains the purchasing power, subjecting to possible risks and losses. Generally, the type of investment risk will vary depending on the nature of the investment.  
 The investment risk of Investment-linked Plan can be divided into 3 broad categories :-  
**A. Market Risk**  
 Is the risk of financial losses arising from the reduction in the market value of assets due to exposure to interest rates and currency risks; this exposure may be influenced by factors which include regulatory changes, inflation movement, economic conditions, financial market conditions, political changes and others.  
**B. Operational Risk**  
 Is the risk of losses arising from inadequate or failed internal processes, people and systems or from external events. The risk includes legal risk.  
**C. Credit Risk**  
 Is the risk of losses resulting from asset defaults, related losses of income and the inability or unwillingness of a counterparty to fully meet its contractual financial obligations. Credit risk is the prospect of failure by a counterparty to perform an obligation to another institution. The risk is applicable for both fixed income and derivatives investment.
